Certified NOAA Paper Charts On Demand!

New!

NOW AVAILABLE FROM MAPTECH!

Richardson's Maptech is an authorized re-seller of nautical charts produced under the authority of National Oceanic and Atmospheric Administration (NOAA) National Ocean Service.

NOAA-certified paper charts are printed when the customer orders them—or “on demand.”

The information on the charts is still maintained by NOAA, and the charts are corrected with Notices to Mariners up to the week of purchase.

All NOAA-certified paper charts sold by Richardson's Maptech fully meet mandatory carriage requirements for ships covered by Safety of Life at Sea (SOLAS) regulations, specified in Title 33 of the Code of Federal Regulations.

NOAA applies all navigation content to each chart.

Key POD chart features:

- The absolute latest version of the NOAA chart
- Updated each week with critical corrections specified in Notices to Mariners
- All navigational content on each chart is applied and certified by NOAA
- Charts are shipped by the next business day
- Available in both standard paper and waterproof paper
- More than 1,000 NOAA charts are available as print-on-demand charts*

**Bookcharts and folio charts require special attention; contact Richardson's Maptech for more information.*
